DETAILED ACTION

1. Applicant's arguments filed on 7/07/03 have been fully considered but they are not persuasive. Claims 1-5 are still pending in this application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 1-5 recites in part "...wherein the light sources are provided so as to have the same parasitic capacitance caused by intervals between the light sources and the light reflection member." This limitation was not given patentable weight because it is unclear as to how parasitic capacitance works in the absence of unexpected test results or any theoretical formula to support this limitation.

Furthermore, Applicant responded that the parasitic capacitance is not an object but it is a physical property like mass, charge, density, etc. Moreover, physical property of matters are not given patentable weight because matters are inherently contain specific physical properties unless they are supported by any unexpected test result in which renders it unobvious. Applicant may amend the specification to include support for the parasitic capacitance without entering a new matter into the specification.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller et al (US pat. No 6,390,638 B1).

Miller discloses a device for illuminating a flat panel display including a light guide (210, fig. 2), and three or more light sources (160, 170, fig. 2), provided at at least one of side ends of the light guide plate, and a light reflection member (220, fig. 2) surrounding the light sources, that reflects light emitted from the light sources to the light guide plate. Miller discloses the invention as claimed but shows only two light sources instead of three light sources. It would have been obvious to one of ordinary skill in the art at the time the invention was made to add more than two light sources since it has been held that mere duplication of essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Response to Arguments

4. Applicant's arguments filed on 7/07/03 have been fully considered but they are not persuasive. Applicant's has failed to show how parasitic capacitance works. Furthermore, Examiner was unable to get to the web site (<http://www.minebea-ele.com/en/product/back1/C-3000/C-3001.html>) in which applicant's attorney had provided in the response. Therefore, Examiner maintains the rejection of claims 1-5.

Conclusion

5. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
